

## **Frequently Asked Questions:**

- 1) Time to charge it? - About 1-2-3-4 hours for Li-ion or SLA battery**
- 2) How fast can it go? - from 20 to 35 mph**
- 3) How far can it go? - can go 20-50-130 miles or 2-3 days riding from one charge.**
- 4) What is the cost for electricity? - about 5 dollars per month, believe or not.**
- 5) No noise - very quiet, and it does not bother your neighbors - the true **Green Vehicle!****
- 6) Parts and warranty?  
- We have stocks of easy tear/wear parts; all e-bikes come with 6-months or longer up to 3 years of warranty. Please see detail for each maker / model**
- 7) Why it saves money? It does this in two ways:  
a) it does not need much maintenance and uses very little electricity (<\$5/month riding daily).  
b) it saves you 75% money on gas and maintenances because you will drive less and not as frequent as before.**
